

## THE VACCINATION NOTICE FOR SCHOOLS OR DAYCARES

The Vaccination Notice is designed to notify the school of the reasons you do not choose to have your son or daughter injected with potentially dangerous products that the manufacturer doesn't stand behind. You refuse to accept the liability for any vaccine injury or illness that might occur from the vaccination(s).

### Let's Make a Deal

The Vaccination Notice informs the school superintendent or daycare administrator that you will consent to their vaccination request if they agree to accept the liability - in writing, **which their lawyers would never let them do**. The statements listed on the notice are factual and easy to validate. The Governor is included on this notice as it is the Governor that must sign the vaccine mandates passed by the legislature into law. This approach should allow the school or daycare the instrument they need to exclude your child from the statutory vaccine mandates.

### FILLING OUT THE NOTICE

1. Items in [brackets] need to be personalized.
2. Select son or daughter as applicable.
3. Corporate entities need to be in all caps.
4. The health department of each state is listed in its corporate name in all caps on Dun and Bradstreet. That information is accessible for free online.
5. At the bottom of the notice is a space for the parent's signature and the signature of two witnesses. Of course the dates need to be identical. A notary is an acceptable alternative.

**It is essential to read, understand and agree with the notice before you sign and deliver it.**

### DELIVERING THE NOTICE

The notice requires little discussion. Just hand it to the clerk responsible for the collection of student paperwork. Explain that it is a lawful notice to be placed in your child's record. Should you be asked where you obtained the notice, simply say from another parent, which is true. Giving more information is not required nor recommended. Citing websites or vaccine aware groups or authors just serves to motivate those in the vaccination-distribution business to track down and discredit (or worse) the folks that are doing their best to bring good information to the public. The less said the better. Let the notice speak for you.

Should the clerk refuse, politely remind him/her that that decision is not his/hers to make as the notice is for both the "agent" and the "principal". You may have to remind the employee that neither the clerk nor his/her supervisor can make decisions for the "principal". Keep a copy of the notice for yourself. Always always always remain polite.

Should the school employee refuse to place the notice in the record, write on the Vaccination Notice "refused by agent (name) on (date)" in the space at the top of the notice. Then take it home and send it certified mail (with the certification # on it) with a return receipt on the envelope to the Superintendent (or head administrator). Keep a copy. Include a short explanatory letter, to the effect of:

*On such and such a date I presented my Vaccination Notice to the agent in charge of school registration paperwork by the name of (name). She refused to accept and forward it to your office. Therefore it is enclosed. Please process it accordingly.*

**VACCINATION NOTICE FOR SCHOOLS OR DAYCARES**  
**Notice to agent is notice to principal - Notice to principal is notice to agent**

Attn: Superintendent of (Bellingham School District)

As the living flesh and blood mother of [Sally Doe], born on [6-5-10] whose lives with me at [2525 Maple Lane, Grove City, Ohio (no zip)], I am prohibited by law from endangering my [son or daughter]; therefore, I declare the following

1) I am aware that those ordering and/or administering vaccines have been granted immunity from liability should my [son or daughter] suffer from a vaccine caused injury or illness. Since the Supreme Court decision *Bruesewitz v. Wyeth* (Feb 22, 2011), drug companies are under no legal obligation to insure their vaccine products are either safe or effective. The same decision defined vaccines as unavoidably unsafe. Vaccine manufacturers pay nothing into the National Vaccine Injury Compensation Program, so it is not an acceptable alternative to me. (Reason listed below - #9)

2) I am aware that vaccine schedules have been established by the CDC and are promoted by public health departments, the American Academy of Pediatrics and other organizations. I do not accept CDC recommendations as science-based. (Reasons listed below - #3, #4 & #5)

3) I do not recognize the CDC as a government health advocacy organization. It is a corporation listed on Dun and Bradstreet and headquartered in the STATE OF GEORGIA, with strong ties to the pharmaceutical industry through the CDC Foundation. Therefore, their recommendations are influenced by the fiscal health of their corporation.

4) I am aware that the [HEALTH, OHIO DEPARTMENT OF], a corporation headquartered in [COLUMBUS OH] and listed on Dun and Bradstreet, receives monetary compensation from the CDC to promote vaccines. Therefore, the state public health department's recommendations and actions are influenced by the fiscal health of their corporation.

5) I do not recognize the AMERICAN ACADEMY OF PEDIATRICS nor the AMERICAN ACADEMY OF FAMILY PHYSICIANS as health advocacy organizations. They are both trade organizations and corporations, listed on Dun and Bradstreet, that are headquartered in the STATE OF ILLINOIS and the STATE OF KANSAS respectively, whose monetary compensation from the vaccine manufacturers contributes to the fiscal health of their corporations.

6) I am aware that LEGISLATORS for the corporation known as the STATE OF OHIO, listed on Dun and Bradstreet, can only vote on rules/statutes for legal "persons" (per their statutory code definitions), not for living men and women or their progeny. Therefore, their corporate statutory vaccination mandates do not apply to my [son or daughter].

7) I am aware of multiple scientific peer-reviewed papers that have exposed the dangers of many vaccines as well as the herd immunity myth.

8) I am aware that the corporation HEALTH & HUMAN SERVICES, UNITED STATES DEPARTMENT OF, listed on Dun and Bradstreet and headquartered in WASHINGTON DC], profits from vaccines patents and determines claims paid from the National Vaccine Injury Compensation Program via a secret administrative process.

9) I have concluded that following the CDC recommendations about vaccinations could endanger the health or life of [my son or daughter].

For the reasons I have listed, I do not agree to have my [son or daughter] vaccinated, unless you or the Governor of the [STATE OF OHIO], sign a document stating that you (or him) in your professional and personal capacity, not me (and or my husband or wife) accept the responsibility and costs for any injury or illness, as defined by the International Medical Council on Vaccination, your required vaccines might cause my [son or daughter] [Sally Doe].

*NOTE: This document can be used to protect those that administer vaccination policies or are obliged to adhere to corporate statutes from any punitive statutory actions or penalties.*
